**GENERAL NOTES**

This drawing is for illustrative purposes only and represents the typical application of Triflex systems. Any references to structural or thermal elements are indicative and for context only and should not be interpreted as design.

All information is based on Triflex's interpretation of current legislation, relevant standards, guidance and industry best practice at the date of issue. Whilst we have endeavoured to follow this guidance, it remains the responsibility of the Designer or Principal Designer to verify all details for accuracy, suitability, and compliance with applicable regulations. Triflex accepts no design responsibility or liability for errors, omissions or otherwise.

This drawing must be read in conjunction with the Triflex Project Specification Proposal (where issued, this takes precedence) and the relevant Triflex technical data current at the time.

Do not scale - use figured dimensions only and verify all dimensions on site. This drawing may not be reproduced or modified without written permission from Triflex.

**LEGEND**

- 1 GENERIC SUBSTRATE (PREPARED)
- 2 ISOLATED SLEEVE FLASHING WITH NON-COMBUSTIBLE INSULATION AND CRAVAT SURROUNDING HOT FLUE
- 3 TRIFLEX PRIMER (IF REQUIRED - REFER TO PROJECT SPECIFICATION)
- 4 TRIFLEX CRYL PASTE APPLIED TO CREATE CHAMFERED PROFILE
- 5 TRIFLEX PRODETAIL® @ 3.00Kg/m² MIN.
- 6 TRIFLEX 110g REINFORCEMENT FLEECE
- 7 TRIFLEX PROTECT® @ 3.00Kg/m² MIN.

Information included in this standard detail is intended for waterproofing purposes only. In accordance with BS 6229:2018 special care should be taken to avoid damage to the roof system when detailing penetrations of the roof by hot pipes and flues whilst ensuring a weatherproof detail. No damage to the proposed Triflex system due to this will be covered under Triflex' warranty.
